trains in time are exposed to the dangers of snakes and robbers lurking in the pits in the tank bed.

Mr Lee the then Sanitary Superintending Engineer who was fully alive to the above inconveniences promised to finish the road in preference to the hundred feet road and already completed other roads where no houses are yet sprung up and where roads are not as necessary as the one in question. Last year the road was aligned and we were sanguine that it would be completed soon. but unfortunately for us no further progress has been made for reasons we are not aware of.

Under these circumstances we pray that that orders may be at once issued to the Deputy Commissioner to acquire and hand over to the D.P.W. the lands required therefor, for which declaration was published several months ago and to the D.P.W for the early completion of the work out of the grant kindly sanctioned by the Govt of His Highness the Maharaja of Mysore for the current year.

For which act of kindness and charity we will feel ever grateful.

We beg to remain

Your most obedient servants
